

Young Women in the CRC 701

Talk - 07.02.2017, 17:00, V3-201

An image says more than a 1000 words

Prof. Dr. Ann Dooms

Vrije Universiteit Brussel

Abstract: Whenever you encounter a digital image or video do you ever wonder whether what you see is real? Digital content is almost always manipulated, be it for practical reasons or on purpose. It is however a daunting task to discover the operations the item has undergone or the path it has followed. In this talk I will introduce you to the main mathematical techniques we employ within our Digital Mathematics research group with far-reaching and surprising applications.

Everyone's warmly invited to attend the talk! There will be a joint dinner afterwards (at 19:00). Please send a short E-mail until Friday, 03.02., if you want to join.

This event is organised by the Young-Women-Initiative.
